

# Project Result 3: Pilot activity plan

## DS4G project 1: Data science for Penkta koja

The project aims it to explore feasibility and the optimal benefits of Data Science aid for “Penkta koja” animal shelter.

The tasks include:

- Identification of the Data science project scope of Penkta koja non-profit organization for improving efficiency of the organization
- discovering sources of data and their processing needs
- setting up a roadmap for potential impact and capacities of data science in the domain of animal care

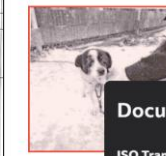

Outcomes:

- The project scope was discussed for a non-profit organization animal shelter Penkta koja. Its added value, project aim, volunteer teams, roles were discussed.
- The github repository [DSLLithuania](https://github.com/DSLLithuania) was established for data and teamwork. As the computerized data did not exist at the organization, it was foreseen by data sample: [https://github.com/DSLLithuania/DS4goodPenktaKoja/blob/main/P1\\_PenktaKOja\\_SampleData.jpg](https://github.com/DSLLithuania/DS4goodPenktaKoja/blob/main/P1_PenktaKOja_SampleData.jpg)
- AI tools for data recognition were analysed and the selected tool was applied for image and text recognition from the scanned paper documents.
- The potential social impact of the project was outlined: The insights and practice of collaboration among specialists of animal care and data science may improve the level of animal aid and safety of community, and encourage volunteer support
